**PROFORT**
ENGINEERING

multiGuard®
can also be used for:

Monitoring of temp./power in server rooms

Monitor temperature, humidity, water on the floor and power supply in the server room. If the temperature rises, water gets on the floor or power supply to the server disappears, an alarm is sent to the person responsible. Alarm can be received as a text message or as a telephone call.

A monitoring system consists of:

| **multiGuard® Technic** Profort no. 008560 | **Temperature and humidity sensor** Profort no. 006320 | **Temperature sensor PTC** Profort no. 007995 | **Felson moisture sensor relay** No. 57.05154.108026 | **Felson moisture cable, 75cm** No. 57.05154.108057 |

PROFORT
ENGINEERING

The multiGuard® series
has many areas of use, e.g.:

Controlling heat pumps

multiGuard® Remote

Controlling irrigation

multiGuard® Light

Monitoring of freezers and cold rooms

multiGuard® Max

Climate monitoring of art and artifacts

multiGuard® Technic RF

Alarm from slurry tanks

multiGuard® Light

Monitoring of pump well levels

multiGuard® Micro

Monitoring of temperature and humidity in construction

multiGuard® Technic RF

Gate opening control

multiGuard® Micro
