

TANK PROTECTION

Intelligent and invisible protection of truck fuel, farm machinery and stationary tanks

100% DANISH DEVELOPED AND PRODUCED

Intrusion into fuel tanks that are mechanically secured usually leads to great material damage. The problem is solved with multiGuard from Profort!

Intelligent and invisible tank protection

With multiGuard from Profort you know exactly when your fuel tank is opened. By your own people - or by uninvited guests!

Experience tells us that mechanical tank protection, such as locking, cause great damage to tank and equipment when the thieves use violence to evade the fuse. That is why the Profort electronical tank protection is the right solution. It cannot be seen from the outside, so the thieves will not try to evade it.

-  Operational from smartphone and PC.
-  Alarms conclude text message, call, email or call to alarm central, and it is possible to connect horn, light and other external equipment.
-  Can be used on stationary tanks as well as on tanks that are installed on machines in motion.
-  The detector is easy to install – completely without use of tools.
